## ESSAY IN DEVELOPMENT

**Del Pino, E. M.**

Modifications of oogenesis and development in marsupial frogs 169

## CONTRIBUTED PAPERS

**Grossniklaus, U., Bellen, H. J., Wilson, C. and Gehring, W. J.**

P-clement-mediated enhancer detection applied to the study of oogenesis in *Drosophila* 189

**Patel, N. H., Kornberg, T. B. and Goodman, C. S.**

Expression of *engrailed* during segmentation in grasshopper and crayfish 201

**Kuopio, T., Tapanainen, J., Pelliniemi, L. J. and Huhtaniemi, I.**

Developmental stages of fetal-type Leydig cells in prepubertal rats 213

**McAvoy, J. W. and Chamberlain, C. G.**

Fibroblast growth factor (FGF) induces different responses in lens epithelial cells depending on its concentration 221

**Cooke, J.**

Mesoderm-inducing factors and Spemann's organiser phenomenon in amphibian development 229

**Duxson, M. J. and Usson, Y.**

Cellular insertion of primary and secondary myotubes in embryonic rat muscles 243

**Fellah, J. S., Vaultot, D., Tournefier, A. and Charlemagne, J.**

Ontogeny of immunoglobulin expression in the Mexican axolotl 253

**Vandenbunder, B., Pardanaud, L., Jaffredo, T., Mirabel, M. A. and Stehelin, D.**

Complementary patterns of expression of *c-ets 1*, *c-myb* and *c-myc* in the blood-forming system of the chick embryo 265

**Mitrani, E. and Shimoni, Y.**

Retinoic acid inhibits growth in agarose of early chick embryonic cells and may be involved in regulation of axis formation 275

**Halfter, W.**

Antisera to basal lamina and glial endfeet disturb the normal extension of axons on retina and pigment epithelium basal laminae 281

**Stephens, L., Kitajima, T. and Wilt, F.**

Autonomous expression of tissue-specific genes in dissociated sea urchin embryos 299

**Stern, C. D., Norris, W. E., Bronner-Fraser, M., Carlson, G. J., Faissner, R. J. and Schachner, M.**  
J1/tenascin-related molecules are not responsible for the segmented pattern of neural crest cells or motor axons in the chick embryo 309

**Sánchez-Herrero, E. and Akam, M.**

Spatially ordered transcription of regulatory DNA in the bithorax complex of *Drosophila* 321

**Oppenheim, R. W., Bursztajn, S. and Prevetie, D.**

Cell death of motoneurons in the chick embryo spinal cord. XI. Acetylcholine receptors and synaptogenesis in skeletal muscle following the reduction of motoneuron death by neuromuscular blockade 331

**Galliot, B., Dollé, P., Vigneron, M., Featherstone, M. S., Baron, A. and Duboule, D.**

The mouse Hox-1.4 gene: primary structure, evidence for promoter-activity and expression during development 343

**Rudnicki, M. A., Reuhl, K. R. and McBurney, M. W.**

Cell lines with developmental potential restricted to mesodermal lineages isolated from differentiating cultures of pluripotential P19 embryonal carcinoma cells 361

**Sutcliffe, M. J. and Burgoyne, P. S.**

Analysis of the testes of H-Y negative XOSr<sup>b</sup> mice suggests that the spermatogenesis gene (*Spy*) acts during the differentiation of the A spermatogonia 373

**Cohen, J., Nurcombe, V., Jeffrey, P. and Edgar, D.**

Developmental loss of functional laminin receptors on retinal ganglion cells is regulated by their target tissue, the optic tectum 381

**Hartenstein, V. and Posakony, J. W.**

Development of adult sensilla on the wing and notum of *Drosophila melanogaster* 389

**Tsunoda, Y., Tokunaga, T., Imai, H. and Uchida, T.**

Nuclear transplantation of male primordial germ cells in the mouse 407
